Grande Prairie School Fair Proved Outstanding Success In Spite of Rainy Weather

Notwithstanding the rainy weather which prevailed on Tuesday, September 10, the Grande Prairie School Fair, held in the Elks Hall, Grande Prairie, was an outstanding success, both from the standpoint of the number of exhibits and their quality.

The wet weather of course prevented many from attending and the number of exhibits was not as large as it otherwise would have been had the day been fine.

One of the outstanding features of the fair was the vegetable class, and more especially the carrots and cabbage.

Those in charge were highly complimented by the judges on the success of the fair.

Grande Prairie people showed a keen interest in the fair and many attended during the day.

Following the judging of exhibits, school inspector L. A. Walker addressed the school children, who had crowded in between the exhibit tables.

Mr. Walker said the flower and vegetable display was outstanding, and the lack of awarding prizes had been a difficult one.

He had been asked to come to Grande Prairie by the Department of Education to see the quality of horticulture produced in this northern part of the province.

To Operate Midget Flour Mill At Grande Prairie

A wire was received on Wednesday, the 11th inst., by T. W. Lawlor, president of the Grande Prairie Board of Trade, from S. H. McCall, of Dawson Creek, B.C., manager of the Dawson Creek Milling Company, Limited.

The Dawson Creek Milling Company, Limited, is the firm which has agreed to open and operate a midget flour mill at Grande Prairie.

It is requested that all those who are interested in the project should pay in the amount of their subscription to either T. W. Lawlor or P. J. Topley, secretary.

The above named firm may be able to complete the building and install the machinery as soon as possible.

It is requested that all those who are interested in the project should pay in the amount of their subscription to either T. W. Lawlor or P. J. Topley, secretary.

ALBERTA'S "MAN OF THE HOUR" AT HOME
These pictures were taken in Calgary after the recent provincial election when Mr. Aberhart's Social Credit Party swept the polls to capture an overwhelming majority in the legislature. Left to right are Mr. William Aberhart and Mrs. Aberhart, while at the center is a picture of the Aberhart home. It was in this institute that the Social Credit system was born.

Social Credit Federal Convention at Fairview Tuesday, September 17

Mr. H. W. Rogers, vice-president of the Federal Social Credit Association, has announced that the annual convention of the party will be held at Fairview, Alberta, on Tuesday, September 17.

The convention will be held at the Fairview Hotel, and will be presided over by Mr. H. W. Rogers. It is expected that a large number of delegates will attend.

Surveying of Thirty Sections of Land Across Wapiti South of Grande Prairie Completed

T. W. Brown, Alberta land surveyor, has completed a survey of 30 sections across the Wapiti district south of Grande Prairie.

The survey was completed in June and the majority of his crew of 10 were recruited in the district.

Mr. Brown said that he found there were 30 sections in the area and that he found them all on the quarter section which he intended to locate on. There were only two cases where the line ran through the building.

In 1912 there were a few quarters surveyed near the river and it was from these that the settlers got their lines.

Reporter: "What about the soil?"
Mr. Brown: "The land here is a little light but gets better as the distance from the river increases. The bridge across the valley, which crosses approximately 1,000 acres, is as rich, from the river, as the land in the Peace River."

Reporter: "To what extent would you say there is arable land?"
Mr. Brown: "From my observation there is still much land capable of producing good crops. Unfortunately some of this will be surveyed."

The surveyor explained that the outer edge of the land surveyed was within twenty miles of Grande Prairie. Last summer he surveyed a large area across the Wapiti, largely through voluntary labor. The approaches to the survey were made with assistance from the department, built in the same way.

When this section of the country is settled and brought under cultivation it will mean much to Grande Prairie. Mr. Brown left on Tuesday to survey the area near the Peace River where there are already some settlers.

Senator H. P. Long, of Louisiana, Shot Down By Assassin

HATON ROUTIER, La., Sept. 10.—United States Senator H. P. Long, known the world over as the defender of his native state of Louisiana, died today of wounds inflicted by an assassin. Physicians battled for 31 hours to save the 42-year-old chief of state, but they were unable to do so. He died of a heart ailment, and a bullet wound in the chest.

He was shot down in the state capital building in Baton Rouge, La., at 10:30 p.m. The assassin and his accomplice were shot and are now in the hands of the law.

Premier Bennett Outlines Radical Reconstruction

OTTAWA, Sept. 10.—Radical reconstruction of the white house problem of debt, federal provincial, railway, municipal and industrial, is the program outlined by Premier Bennett in his speech to the House of Commons today.

Mr. Bennett outlined a program of radical reconstruction, including the creation of a new federal debt, the nationalization of the railways, and the creation of a new industrial system.

L. A. Walker, New Inspector, Takes Over Duties

Mr. L. A. Walker, the new inspector of schools for Grande Prairie and district, arrived last Sunday. He took over the duties of the late Mr. J. H. Walker, who had been ill for some time.

Mr. Walker is a well-known educator and has been in the service of the Department of Education for many years.

Plant Pathologist Making Survey of G. P. District

W. C. Broadfoot, plant pathologist at the Dominion Laboratory at the University of Alberta, arrived in Grande Prairie last Friday on the westbound train.

Mr. Broadfoot is making a survey of the plant diseases in the Grande Prairie district. He will be working in the area for several weeks.

CROP ESTIMATED AT 275,000,000
WINNIPEG, Sept. 10.—A wheat crop of approximately 275,000,000 bushels for the season is indicated today in the final 1935 crop report of the Winnipeg Free Press.

Timely Hints From the Beaverlodge Sub-Station

By W. D. Albright
"IT IS A PLEASURE AS WELL AS A DUTY TO SERVE"

Amid election agencies who want to be bothered reading "Timely Hints?"

Old and Peabody barbers are carrying themselves better than most in the variety test this year.

Don't let the milk flow fall in the fall. A few bundles of frosted crop will do considerable to help it out.

We are inclined to blame our system for what are really the faults of human nature. These periods of no matter how we revolutionize the system.

There is something very fragrant about the smell of new-mown hay or of fresh-cut grass. It is one of the compensations of farming.

Looks as though there would be plenty of fodder and feed grain in the country even if not an every farm. Hay is enough and stock to use it all.

The moon was full on August 14. Injuries from the night of 18 and 24. I shall be doing them all on the moon of 1935. If so, it must have had a lengthy apogee.

Pigs can be grown quite well on good oats plus a little skim milk or linseed and a natural supplement, but some heavier grain is needed for best results in finishing off and a proportion of heavier grain throughout is desirable.

The second growth of alfalfa last month was almost uniform across the whole of the province and practically as tall in the mass formation as it was on plant material. In dry years the edges of the alfalfa are usually the first to be killed. Under extreme conditions the second growth is sometimes killed in places.

Increase in alfalfa yield is apparent this year when so many fields are green and lush. It is true the alfalfa has also fallen badly, whereas in other years they stood erect while Bunker and Victory were down. But the alfalfa was ready to cut in early September while the standard kinds were still as green as

grass except where lodged and bleached by frost. Probably the depression caught the alfalfa this year at a critical stage.

For the second season in succession good alfalfa stands have been harvested from alfalfa stands. A stack of second-cut alfalfa hay was put up on the Sub-Station without rain. It looks good enough for a stack to eat. For domestic live stock it should be worth almost as much per ton as hay. It is now being wintered on it and a feed of 3 to 4 cattle goes far to improve the straw or hay ration. Quite a comfort to have such fodder when frost makes one uneasy about the feed-rain supply as it did to many of us for a while. A long stubble was left where the aftermath was cut late.

When to Cut a Frosted Crop

How soon do you usually cut a crop after a frost of four to ten degrees? It is a question that arises more than once. I believe it helps to ripen the straw to aid in the digestion of the crop.

Answer: Much depends upon the kind of grain, the severity of the frost and whether or not the straw is to be fed. Some crops, like alfalfa, are better cut after a frost of 10 to 15 degrees. Others, like timothy, are better cut after a frost of 5 to 10 degrees.

Basal Glume Rot of Wheat
The basal glume rot of wheat is a disease which is caused by a fungus. It is most common in the western provinces and is caused by a fungus. It is most common in the western provinces and is caused by a fungus. It is most common in the western provinces and is caused by a fungus.

the fungus disease called basal glume rot, and stem rot. Basal glume rot is rather common in western wheat but by no means confined to that variety and this year seems to be more generally prevalent than usual, so far as our own observation goes. It is named from the fact that it affects particularly the base of the glume, turning it a dark brown, and also works through that to the base of the kernel, which is likewise darkened.

Maturity Retarded by Rain and Low Temperatures

Three and two-fifths degrees depression in mean August temperature accounts for quite a little of the tardiness in the ripening of the crop. The August mean of 54.5° at Beaverlodge was 1.37° below the previous nineteen-year average, being the lowest in twenty years. Coupled with a sub-freezing temperature of 20.9° on the morning of the 10th and 11th and with 31.2° on the 25th, this general low temperature caused the crops to linger in previous incidence. It really seemed as though the frost, instead of promptly whitening the crops, was having it stand off and done interfered with the progress of the crop. At all events the end of August saw very little cutting accomplished. It is a question that arises more than once. I believe it helps to ripen the straw to aid in the digestion of the crop.

Answer: Much depends upon the kind of grain, the severity of the frost and whether or not the straw is to be fed. Some crops, like alfalfa, are better cut after a frost of 10 to 15 degrees. Others, like timothy, are better cut after a frost of 5 to 10 degrees.

"Take-All" Root Rot of Wheat

One patch of wheat field is particularly bad with an affected area of wheat as per enclosed specimens—A. G. Hoff, B.C.

Answer: The color of the crown roots was not quite typical of the disease. It is a question that arises more than once. I believe it helps to ripen the straw to aid in the digestion of the crop.

Answer: Much depends upon the kind of grain, the severity of the frost and whether or not the straw is to be fed. Some crops, like alfalfa, are better cut after a frost of 10 to 15 degrees. Others, like timothy, are better cut after a frost of 5 to 10 degrees.

Autumn Plantings of Saskatchewan

When to plant wheat for a late crop? The question arises more than once. I believe it helps to ripen the straw to aid in the digestion of the crop.

Answer: Much depends upon the kind of grain, the severity of the frost and whether or not the straw is to be fed. Some crops, like alfalfa, are better cut after a frost of 10 to 15 degrees. Others, like timothy, are better cut after a frost of 5 to 10 degrees.

CHEESE AND MILK SURVEY

With a view to obtaining information with respect to the consumption of cheese and milk in Canada, a survey is being undertaken by the Dominion Department of Agriculture.

The survey is being conducted in Ontario, Quebec, and the Prairie Provinces, and information is obtained from homes in cities, towns and farms. The survey has already begun in Oshawa, which has been selected as a city representative of the industrial cities of Ontario.

MINUTES OF MUNICIPAL DIST. OF BEAR LAKE No. 740

Minutes of meeting of the Council of the Municipal District of Bear Lake No. 740, held on the 11th day of August, 1935, at 8 o'clock, P.M., all the members of council being present.

1. The minutes of the meeting held July 27, 1935, were read. Moved by Coun. Smith that minutes be amended so as to amount to the sum payable to H. Sinclair by increasing same by \$5 and that the amount payable to L. V. Macklin be decreased by \$5 and that otherwise the minutes be adopted as read. Carried.

2. The financial statement for the month of July was placed before the council.

3. Mrs. A. Peabody attended on the council regarding the assessment of the N.E. 13-72-2, and stated that the land ordinarily was hay land, but owing to the flood condition of Bear Lake the land was not producing this year. After some discussion it was pointed out that the council had no power to deal with at this time and that an adjustment in the assessment could be made at the time of the next triennial assessment.

4. Mr. Harry McKee attended on the council with reference to a proposed lease of the property of the Municipal District of Bear Lake, known as the 28th day of September, 1935, to the north side of S.E. 13-72-2. He claimed that according to this district the natural watercourse, the right of way of the Municipal District was being flooded. He protested that the water draining from about ten sections was being held up by the dam and that the property was being flooded. Moved by Coun. Smith that the matter be referred to the Board of Public Works for their consideration. Carried.

5. Messrs. Henderson Brothers attended on the council with reference to the draining of water from S.E. 13-72-2 and the damming up of water on the north side of S.E. 13-72-2. He claimed that according to this district the natural watercourse, the right of way of the Municipal District was being flooded. He protested that the water draining from about ten sections was being held up by the dam and that the property was being flooded. Moved by Coun. Smith that the matter be referred to the Board of Public Works for their consideration. Carried.

6. Mr. J. M. Macdonald attended on the council with reference to the draining of water from S.E. 13-72-2 and the damming up of water on the north side of S.E. 13-72-2. He claimed that according to this district the natural watercourse, the right of way of the Municipal District was being flooded. He protested that the water draining from about ten sections was being held up by the dam and that the property was being flooded. Moved by Coun. Smith that the matter be referred to the Board of Public Works for their consideration. Carried.

7. Moved by Coun. Smith that the matter be referred to the Board of Public Works for their consideration. Carried.

8. Moved by Coun. Smith that the matter be referred to the Board of Public Works for their consideration. Carried.

9. Moved by Coun. Smith that the matter be referred to the Board of Public Works for their consideration. Carried.

10. Moved by Coun. Smith that the matter be referred to the Board of Public Works for their consideration. Carried.

11. Moved by Coun. Smith that the matter be referred to the Board of Public Works for their consideration. Carried.

12. Moved by Coun. Smith that the matter be referred to the Board of Public Works for their consideration. Carried.

13. Moved by Coun. Smith that the matter be referred to the Board of Public Works for their consideration. Carried.

14. Moved by Coun. Smith that the matter be referred to the Board of Public Works for their consideration. Carried.

15. Moved by Coun. Smith that the matter be referred to the Board of Public Works for their consideration. Carried.

16. Moved by Coun. Smith that the matter be referred to the Board of Public Works for their consideration. Carried.

17. Moved by Coun. Smith that the matter be referred to the Board of Public Works for their consideration. Carried.

18. Moved by Coun. Smith that the matter be referred to the Board of Public Works for their consideration. Carried.

19. Moved by Coun. Smith that the matter be referred to the Board of Public Works for their consideration. Carried.

20. Moved by Coun. Smith that the matter be referred to the Board of Public Works for their consideration. Carried.

21. Moved by Coun. Smith that the matter be referred to the Board of Public Works for their consideration. Carried.

22. Moved by Coun. Smith that the matter be referred to the Board of Public Works for their consideration. Carried.

23. Moved by Coun. Smith that the matter be referred to the Board of Public Works for their consideration. Carried.

24. Moved by Coun. Smith that the matter be referred to the Board of Public Works for their consideration. Carried.

25. Moved by Coun. Smith that the matter be referred to the Board of Public Works for their consideration. Carried.

APPLE COLOR CHART

An ingenious color chart to assist in the harvesting of McIntosh and Fameuse apples at the proper stage of maturity has just been issued by the Horticultural Division, Central Experimental Station, Ottawa, Dominion Department of Agriculture. Every apple grower knows that the stage of maturity at harvesting largely influences the ultimate keeping qualities of the McIntosh and Fameuse varieties, particularly when the apples are kept at low temperatures. Immature apples stored at 32 or 36 degrees F. will develop acid upon removal from cold storage to a temperature of 60 degrees or higher, whether the apples are wrapped in oil paper or not. Apples picked at the proper stage of maturity, as indicated by a certain shade of green, are most suitable for storage.

The chart is made up of 25 color disks, each representing a different shade of green. The disks are arranged in a circular pattern, with the most mature shade of green at the top and the least mature shade at the bottom. The chart is used by comparing the color of the apples to the color of the disks. The shade of green that the apples most closely resemble is the shade of green that they should be harvested at.

The chart is a valuable tool for apple growers, as it helps them to determine the best time to harvest their apples. By using the chart, growers can ensure that their apples are harvested at the proper stage of maturity, which will result in apples that are of the highest quality and that will keep for a long time.

The chart is available for purchase from the Dominion Department of Agriculture, Ottawa. It is also available for loan from the Dominion Department of Agriculture, Ottawa. The chart is a valuable tool for apple growers, as it helps them to determine the best time to harvest their apples.

The chart is a valuable tool for apple growers, as it helps them to determine the best time to harvest their apples. APPLE COLOR CHART

An ingenious color chart to assist in the harvesting of McIntosh and Fameuse apples at the proper stage of maturity has just been issued by the Horticultural Division, Central Experimental Station, Ottawa, Dominion Department of Agriculture. Every apple grower knows that the stage of maturity at harvesting largely influences the ultimate keeping qualities of the McIntosh and Fameuse varieties, particularly when the apples are kept at low temperatures. Immature apples stored at 32 or 36 degrees F. will develop acid upon removal from cold storage to a temperature of 60 degrees or higher, whether the apples are wrapped in oil paper or not. Apples picked at the proper stage of maturity, as indicated by a certain shade of green, are most suitable for storage.

The chart is made up of 25 color disks, each representing a different shade of green. The disks are arranged in a circular pattern, with the most mature shade of green at the top and the least mature shade at the bottom. The chart is used by comparing the color of the apples to the color of the disks. The shade of green that the apples most closely resemble is the shade of green that they should be harvested at.

The chart is a valuable tool for apple growers, as it helps them to determine the best time to harvest their apples. By using the chart, growers can ensure that their apples are harvested at the proper stage of maturity, which will result in apples that are of the highest quality and that will keep for a long time.

The chart is a valuable tool for apple growers, as it helps them to determine the best time to harvest their apples. Interesting News From Sexsmith

Vol. IV, No. 12

By R. A. MACLEOD

Sept. 10, 1935

It is nice to see the school children going to school these days with their faces shining with soap and enthusiasm. We would venture to state, however, that the shine is mostly derived from soap if we were to judge by our own school days.

TOMMY'S BIRTHDAY PARTY

Quite a few of the younger people appear to be having their birthdays this month and several parties have already been held. Tommy Macleod started off with one on Saturday afternoon last, when he celebrated the age of eight, and there appeared 18 guests, both male and female. The presents were numerous, some being in cash, which will provide Tommy with Sunday school collection at the rate of a nickel a Sunday until Christmas, providing he does not spend it in the meantime. This about as doubtful as trusting a rabbit with a bunch of lettuce or a soldier with a little gin.

Several games were indulged in, including a few fights among the male portion. With the exception of smacking the back of the head and slapping the nose, the fights were entirely harmless. We will not go into any further details, except to say that a very nice party was had by all.

Supper was served at about five o'clock and after carefully maneuvering to get them in through the door without some one being hurt, the guests were finally seated at the festive board. After filling themselves up to the limit, the guests dined on cake, with eight candles on it was brought in. This cake contained several nickels and buttons, and a couple of horseshoes for good luck. The writer had the pleasure of serving the drinks, and apparently a great drought had swept over the community previous to this party.

Those present were: the Misses Audrey Neve, Eva Roberts, Vera Baker, Delphine Brown and Shirley McMillan. The bucks consisted of Jimmy Walker, Gordon Douglas, Frank McNaughton, and Harold Olson. Dances were given by the boys, and the girls were very much pleased. The party was a success and all enjoyed it very much.

DANNY CELEBRATES HIS SIXTH

On Monday, September 9, Danny Shannon invited a few of his friends to celebrate the sixth anniversary of his birthday. At Danny's age the female of the species have very little amusement in this sort of thing, so consequently the party was mostly boys. However, two little girls were invited, and they were very much interested in the party. After the games were played, lunch was served, which according to Harold, all the guests ate simple justice to. As at all children's parties, the cake was the highlight of the party. The cake was very nice and all went home feeling that the day was not entirely lost and that another good time had come to an end.

ON ANNUAL VISIT TO SON

Mr. F. R. Smith, who is with the C.P.R. at Vancouver, is here on his annual visit to his son and daughter. Mr. Smith is a very busy man, but he always finds time to visit his family. He is a very kind and generous man, and his family is very proud of him.

PIPESTONE CREEK

There are consistent rumors that several of the younger set around Pipestone Creek are planning to start a new school. This is a very interesting idea, and it is hoped that it will be successful.

MAIL SERVICE A SUCCESS—TO CONTINUE

The appreciation of the service of the new mail delivery service from here to Pipestone Creek has made it possible to establish this on a permanent basis. Arrangements have been completed with Dunc Bain to carry on throughout the winter.

WORK TO GRAD ON FERRY

The presence in the neighborhood of the district engineer yesterday helped the work on the ferry. The work on the ferry is progressing well, and it is hoped that it will be completed soon.

WORK ON WEST PIPESTONE ROAD ABANDONED

The improvements have been made on the above road this summer, with the object of making it a main road. Work has, however, been abandoned since the election. It is now hoped that returning Mr. Dunc Bain in the future will make it possible to complete the section by Jensen's corner before freeze.

Mr. Russell of Hinton's Bay fame and Mrs. Russell have visited Pipestone Creek last week. Captain Mahood, I.N.R., accompanied the party.

BUILDING NEW POST ON PORCUPINE

Marion Sanders and Dan St. Arnaud left here on Saturday 2 with five pack horses carrying the tools and equipment to build a post on the Porcupine. Lumber for the doors, windows and floor will be manufactured on the spot. The new post will include a complete line of trappers' supplies and groceries, will open on November 15. The building will include electric light and long distance radio, and a bunkhouse will be built for visiting trappers. This advance party in charge of Henry Joachim, which left here three weeks ago, has not completed putting up the hay which will be required for the pack outfit this fall.

First class mail will be delivered to the Porcupine three times yearly, also to intermediate points such as Pine Creek and Muddy Creek.

BEAVER LODGE WINS FRANK DONALD CUP BY DEFAULT

The Beaver Lodge ladies' basketball team traveled Grande Prairie on Saturday night in quest of the Frank Donald Cup, held by the Grande Prairie team.

As it was impossible for the local team to assemble a team, the cup was given to the visitors by default.

The Beaver Lodge girls came down all packed up and ready to battle for their lives for the coveted cup.

VALHALLA CENTRE

HELPING HANDS MEET VALHALLA CENTRE, Sept. 10.—The Helping Hands Society met at the home of Miss Marie Buckholdt on the evening of September 10. Most of the members attended. After a very successful business meeting a dainty lunch was served.

WINTER WHEAT CUT

The crops are ripening well and are so badly frozen as was thought at first. Some estimate the damage to be about 15 per cent. Winter wheat has been cut, cutting of spring wheat is in a few places out, has started.

HAD REAL GROWN-UP PARTY

Little Miss Audrey Hanson celebrated her third birthday anniversary party last—real grown-up party, too.

A number of young people journeyed to Grande Prairie last Saturday to shop and take in the show.

VALHALLA NEWS

VALHALLA, Sept. 9.—Martin Flaten and family, Miss Meyer and Helmer Doime were Grande Prairie visitors on Saturday last.

We are glad to hear Elmer Lundquist is well and hope he will soon be home to see his family.

SEEN AND HEARD

Mr. Reed measuring his length on the highway. Herbert travelling north regularly. Stepping out, eh Vic? Helmer J. has cut the distance in half. Helmer J. enjoyed his trip to G. P.

DEMMITT NEWS

DEMMITT, Sept. 10.—Mr. Jas. Morton is a very busy man these days completing his house.

HAVING EXTRA HOLIDAY

School children are having an extra holiday today in honor of the school board not getting a teacher. The parents are quite upset and are in a hurry to get their children to school. The school will soon open, as it is very hard for some of the children to attend during the cold winter months.

Meese, G. Sipe, Bill Ende, T. Hanson, N. and W. Underwood and A. Borkes have gone out to harvest. Here is wishing them lots of luck.

Mr. and Mrs. Graydon Sipe have been busy altering and building out their house. They are very nice change indeed.

Mr. and Mrs. Devine motored to Dawson Creek on Monday, returning here on Friday. J. Atkinson, who has been working for J. Scriver in the saw mill for the past two months.

Rev. W. H. Moss held his regular church services here on Sunday last, with a very good attendance.

RALLY DAY SEPTEMBER 22

The Sunday School Rally Day will be held here in the schoolhouse on Sunday, September 22, with Rev. W. H. Moss acting as the regular services. All welcome.

Mr. M. Keppine is a busy man these days, working on his house. He is wishing them lots of luck.

Mr. P. Hanson has taken advantage of the cheap rates on the N.A.R. and is on his way home. He is wishing them lots of luck.

SEEN AND HEARD

Jim assisted by Lily, dragging wires. Bill going northwest Saturday night. Here is the new cut-out trail, huh? Don't try to hold his own against both the girls and dogs. Think you'd better watch your step. Don't ask me.

Evlyn looking kind. Never mind, Eve, the Ford will soon be back.

The most satisfactory material so far for the building of the new school is sodium fluoride, sold by druggists in large quantities. It is a fine white powder, as sodium fluoride is somewhat poisonous, care should be taken to prevent children from getting it. It is a very good material for building.

EAGLESHAM NEWS

NURSE BACK FROM VACATION EAGLESHAM, Sept. 8.—Miss C. district nurse, arrived in Eaglesham on Sunday, September 8, and will attend to all children requiring vaccination all day Monday at O. Forrester's. Miss C. has been enjoying a pleasant holiday, but is glad to be back in "harness" again.

Mr. and Mrs. W. Parrot and daughter, Evelyn, of Edmonton, are the guests of Mr. and Mrs. Ed. Carney.

TO HOLD LITING BEE

A quilting bee under the auspices of the local W. A. will be held on September 19, at the home of Mrs. R. P. Henderson.

Archie Leblond and Bill Greenan invested in new binders this fall.

Adam Bell also purchased another binder last week.

Mr. and Mrs. Ed. Carney and their visitors motored to Peace Coulee and back last Sunday.

Mr. and Mrs. Cliff Lawrence, accompanied by the family, left on a trip to their old home on the prairie, where they intend to spend the winter.

Ed. McDaid was a week-end visitor in Eaglesham.

Charlie Reid returned to his duties on the section after a few months absence "sabbatic" as foreman. Jimie Murphy is still on the job also.

HAYMAKERS BUSY Ovin Forset has the greater part of his wheat out and most of the wheat in Fox Creek has been harvested. Haymakers are working feverishly while the weather remains fine, and a new and vicious crop of mosquitoes are making things merry for everybody.

SHOW INN WORKINGS Mr. "Silly" Williamson was back on Sunday to a group of "silly" interested in the inner workings of the elevator. He was accompanied by Mrs. O. Forrester, Miss A. C. and Mrs. A. L. Powers, Wesley Warner, Tony Deane, and others. Mr. Williamson explained the different bins, shafts, chutes, etc., and all enjoyed a most instructive hour.

Wesley Warner is in town for a few days, cutting O. Forrester's wheat.

Mr. Hogan, who for Voss Bros. Construction Company, with Mr. Brown and Miss A. Ziegler will leave on Saturday for a week-end visit to their homes on Friday and Saturday.

ONLY "STEEN" DAYS TO XMAS Christmas is only a few days off. Joe McDaid doing a brisk trade with a beautiful new line of personal greetings. The holiday season is here and summer wasn't nearly over yet!

DAZZLED BY ELECTION RESULTS EAGLESHAM, Aug. 31.—Well, the election is over and we are still a little dazed from the results. After so much hardship, the "Uplift" party has won. It is a little hard to believe, but the results are what they are. The "Uplift" party has won, and the "Downfall" party has lost.

NEW ELEVATOR COMPLETED Our elevator is now an accomplished fact and stands proudly like a sentinel on guard over our little community. It is a fine piece of machinery and is equipped with a seed grain cleaning machine. Mr. Hogan and his boys did a fine job of it. The elevator is now open for business.

ROAD WORK ABANDONED Work on the Tangent-Eaglesham road has had to be abandoned for a while, due to the weather. The road is now in a very bad state of repair and it is not safe to travel on it.

Mr. and Mrs. D. Prosser have arrived home from a week's trip out to visit relatives.

Mrs. J. Redgrave has gone for a two months trip to Bismarck to visit her parents.

V. O. Stearns, the auctioneer, is tuning up his voice, expecting a big business after threshing.

Pete Reiswig has just pulled his tractor in for a busy season. He is now working for himself and others.

Louie Komar returned after a few months at the coast. Welcome home, Louie!

Dan Reiswig has the stiffness work of his new binder. It is doing better work every day.

The road work done recently in this district is greatly appreciated.

Our public school teacher is a little late in arriving, but the children will soon be carrying their books to the little schoolhouse on the corner.

Word was received by the American Geographical Society of the successful ascent of Mount Stein, 16,438 feet high, by Walter Wood, who led an expedition for the society into the Yukon territory. The feat has never before been accomplished.

Mrs. Leo McDaid arrived home from Spirit River Hospital last week with a new baby daughter. Congratulations, Jan.

We noticed that Riley of Bellow in town last week, on his way home from Tangent with a new car.

Wild ducks were never so plentiful and there are very few in the grain fields. Crops are steadily ripening and the grain is ready for harvest if the frost keeps away.

BUFFALO LAKES

DANCE WAS A "WOW" BUFFALO LAKES, Sept. 9.—Quite a number of Buffalo Lakes sailed forth last Friday night to An Henderson's barn dance. According to their reports the dance was a "wow," and their guests a premium. An excellent lunch was supplied by the Scene Heights Ladies Aid.

Mr. and Mrs. W. Parrot and daughter, Evelyn, of Edmonton, are the guests of Mr. and Mrs. Ed. Carney.

TO HOLD LITING BEE

A quilting bee under the auspices of the local W. A. will be held on September 19, at the home of Mrs. R. P. Henderson.

NORTH GOODWIN

(Received by Friday's Mail.) NORTH GOODWIN, Sept. 9.—The Goodwin people are pleased to know that a store is being erected in the district by Mr. B. McArthur of Deloit. Mr. A. Lense and A. Land are doing the carpenter work. We welcome Mr. and Mrs. McArthur to our midst and wish them success in their undertaking.

Mr. and Mrs. Fred Sedore were dinner guests at the Howard Henry home last Sunday.

Wallace White and Joe Newman were business visitors at Grande Prairie on Saturday.

Services were held at the schoolhouse last Sunday by Rev. R. J. Pierce of Grande Prairie. Five children were christened in this and a large crowd was in attendance.

Mr. and Mrs. Ed. Moore spent the week-end in Grande Prairie and Beaver Lodge.

Announcement of inauguration of a monthly mail service between Fort Chipewyan, Alta., and a new post being opened at Goldfields, B.C., was made by the Post Office Department recently. Goldfields is situated on the north shore of Lake Athabasca, about 120 miles east of Fort Chipewyan.

Demonstration of a batteryless telephone which generates its electricity from voice sounds has been made by the Northern Electric Co. of Fort Chipewyan.

Reene Pelletier, who was recently in contact with Mr. Aberhart, and the Premier expressed his disappointment that Grouard was the only constituency in the province which failed to elect a Social Credit candidate.

and feature of the Jossard convention was the sudden death of Mr. Wm. Kettley of High Prairie, who on Thursday morning was found dead in one of the cabins, a victim of heart failure.

DISTRICT ENGINEER PLEASED WITH ROAD WORK J. H. Johnson, district engineer, was in town on Monday inspecting the two-mile shortcut west of town, which will take the highway through High Prairie and the district engineer is pleased with the work done.

The road was prepared under the direction of J. W. Randall, foreman, and Geo. Weston, sub-foreman, and the grading done by Kitter and Beaman. The district engineer expressed great pleasure in seeing the road and the excellent work done.

It is hoped that the work will start on the Grouard road east of the post office in the near future, so that the road will be completed before Simon Stroeder and Pete Oskier are in charge as sub-foremen.

COMMUNITY'S SYMPATHY GIVEN TO BEREAVED PARENTS The sympathy of the entire community is extended to Mr. and Mrs. Geo. Perry, who lost their fourteen-year-old daughter, Marie, on September 3, after a short illness. Mr. Campbell of the United Church spoke most beautifully for the bereaved parents.

Mr. S. L. Jones, of the United Church choir sang "Safe in God's Arms." The service was held at the home of Mr. Campbell.

ROOMS FILLED TO OVERFLOWING School is well under way at present and all rooms are full to overflowing. The teachers all returned except Mr. Stephens, who resigned to accept an engineering position, and is succeeded by Mr. Boucher, in grades VII and VIII.

SHOCKED BY SUDDEN DEATH OF WM. KETLEY The community was shocked to learn of the sudden death of Mr. Wm. Kettley at Jossard on September 5, while he was attending a meeting of the Social Credit directors. An old-timer and living just on the outskirts of High Prairie, Mr. Kettley was well known to the entire community and his sudden death was much regretted.

A military funeral was held on Saturday afternoon from the home of Mr. Kettley. The funeral was held at the home of Mr. Campbell and a shroud tribute to the soldier and the man who had done his duty for his country. The funeral was held at the home of Mr. Campbell and a shroud tribute to the soldier and the man who had done his duty for his country.

The Lewis machine gun, standard equipment for the British army since Great War days, is being replaced as rapidly as possible by a new and lighter weapon produced in Czechoslovakia known as the Bren gun.

Four workmen were killed and four wounded when a road construction laborer sank a pick into an unexploded Great War shell. The accident took place on the road between Venice and Fairview, Italy.

ILLUSTRATED NEWS OF THE WEEK

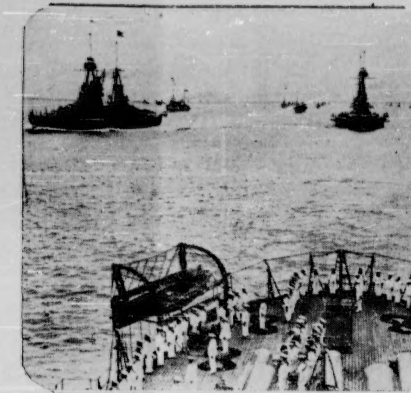

A SPECIAL TRIBUNE FEATURE

THE BEST OF THE WEEK'S INTERESTING NEWS PICTURES

NATURE PROVES TROUBLESOME BARRIER TO ITALY'S AMBITIONS

This remarkable map presents a graphic idea of the nature of the country which may be the background of the Italian and Ethiopian forces. The rough, barren terrain is marked by impenetrable gorges, thorny scrub, impassable ravines, treacherous swamps and rocky mountains. Much of the plateau section is waterless and the intense tropical heat makes it a place of life. At the left corner of the map is shown the capital city of Addis Ababa, connected by a highly important single-track railroad to the seaport of Djibouti. It is in this sector that Italy is expected to strike.

ITALY'S MEDITERRAN FLEET

This view of the Italian fleet as it appeared during recent maneuvers gives some conception of the naval strength which Mussolini has assembled in the Mediterranean. The British naval unit standing by near the Suez Canal, gateway to the East, is not as strong numerically as the Italian fleet, but is much more efficient and powerful.

Manufacturers whose production is largely for the automobile industry show sales record for automobiles and parts manufacturers \$4,950,041, and to equipment, outfit, \$55,101,100. Products of these manufacturers include cotton, storage batteries, wire and cable, upholstery fabrics, paper products, forgings and castings, lamps, springs, brake lining, automobile bodies, lumber and wood products, and manufacturers of iron and steel.

Substantial increases are shown in export business. Exports in 1934 comprised 43,308 cars and trucks valued at \$17,205,704 and parts valued at \$2,415,222, compared with 20,403 cars and trucks at a value of \$8,500,000 and parts valued at \$1,237,002 in 1933. Exports of passenger cars increased 97.5% in number and 60% in value. Trucks gained 104.3% in number and 149% in value, and the value of parts increased by 80.6%.

Canada's best markets for automobiles and parts in 1934 in order of importance, were: United Kingdom, Spain, British India, New Zealand, British West Indies, British Borneo, Settlements, British East Africa, Southern Rhodesia, Hong Kong, Ceylon, United States, British West Africa, Malia, Portuguese Africa, and Newfoundland, while numerous other countries also appear in the list to which Canadian cars were shipped.

Registrations for the year showed an increase for the first time since 1931. The number of motor vehicle licenses issued in 1934 was 1,120,532, compared with 1,083,178 in 1933 and 1,115,533 in 1932. Registrations were still lower than in 1929, 1930 and 1931. The percentage gains by provinces were as follows: Ontario, 4.2%; Quebec, 3.4%; British Columbia, 3.9%; Saskatchewan, 7.9%; Alberta, 3.8%; Manitoba, 2.5%; New Brunswick, 8.4%; Nova Scotia, 3.7%; Prince Edward Island, 2.8%; Yukon, 8.5%.

Passenger car licenses in 1934 numbered 947,693, trucks 164,717, motorcycles 10,369, taxicabs 4,701, motorbuses 790, and ambulances, hearses, etc., 1,283.

Provincial governments collected over fifty million dollars in gasoline taxes and registration fees in 1934. In Ontario motor vehicle owners contributed 44.2% of the total revenue and in Quebec 36.8%.

The surfaced highway mileage at the end of 1933 as reported by the several provincial departments amounted to 34,723 miles and unfaced roads to 314,463 miles, making a total of 449,184 miles. Expenditures on highways during 1933 totaled \$40,365,054, including \$27,854,579 for capital expenditures and \$12,510,475 for maintenance. In 1932 the amount spent on highways was \$71,492,840. Data for 1934 is not yet available.

Tourist travel showed a considerable revival. The number of automobiles from the United States for touring purposes was 3,261,848 in 1934 compared with 3,096,887 in 1933. It is estimated that the expenditures of these tourists in Canada were \$86,250,000 as compared with \$77,250,000 in 1933.

The statistics presented here have been obtained, unless otherwise stated, from the Dominion Bureau of Statistics.

G. P. Model Flying Corps

THE FLYING FLEA

In last mail I received an answer to my letter to the "Flea" from Air Commodore J. A. Chanier, Secretary-General of the Air League of the British Empire, and also, President of the "Flea" Club of Great Britain. Up to date there are 30 "fleas" flying successfully in France and two in Great Britain. In three weeks time I hope to have all the dope on building this machine. It is now up to all those who are interested to get together so that we can form a Flying Club, which will be quite independent from the Model Flying Corps. If we can form one we will have the very first machine of this type on the North American continent. Any one between the ages of 18 and 30 who is interested in building or flying this type of machine, and would like to get a club formed, will please give their names to Harvey Black, Russell Burgess or J. W. Neil. If we find that we are going to get enough support we will call a meeting for Sunday, September 22, hour and place to be stated later. Then we can elect officers and get started in a business-like way. So if you want to see Grande Prairie on the map, or in the air, now's your chance. Remember, the more members we have the easier it will be on the pocket-book.

Perhaps some of the readers of this column will remember seeing the pictures in the Sunday Mirror, about three weeks ago, of a Boeing B-amber and a P-12 in a full-page article describing the machines, our American cousins, with their usual modesty, let the old world know, that as far as they knew there was nothing on the earth or in the air, that was better than American aero-engines or planes. Well I think air Maudslayi Campbell answered one of the challenges last week. With an A1210 engine in an automobile he put up a speed equal to the fastest American aeroplanes. The following clipping, taken from the bulletin of the British Aircraft Manufacturers Association, is significant: "The reputation in Latin America of British aeroplanes and engines is greatly enhanced following, in the words of the aeronautical correspondent of The Times, the comedy of aviation in which British and American military aircraft took part. Some time ago the Fairies Company secured an important contract from the Peruvian government in the face of heavy competition from firms in the United States and France. The machines supplied were Fairies-Fox two-seat biplanes, each equipped with a single Rolls-Royce Kestrel 525 h.p. liquid-cooled engine. As soon as they were taken into service a series of flights was begun to test their capabilities in range and transport of military load, and thus to provide the air staff with information on which their future policy might be based. One of these flights took them from Lima over the Andes to Cuzco, 360 miles, and 17,700 feet from sea level. There the fuel tanks were replenished and the planes took off again with full load on board and flew back to Lima in formation at an average speed of 180 miles per hour.

This performance moved the Americans to attempt emulation. American single-seat fighters of a well-known make and equipped with 700 h.p. engines, were prepared for demonstration and flown from Lima over the Andes to Cuzco, which is 80 miles from Lima and 10,000 feet up. There the flight ended, because the aeroplanes were unable to take off again in the thin air at that height. Many attempts to take off were made, but all of them failed and finally the machines were dismantled and packed in crates for an inconspicuous journey by train back to Lima.

Evidently the Peruvians chose wisely when they decided to acquire the British machines. War planes that cannot escape under their own power, no matter how lightly loaded, from aerodromes located at heights of 10,000 feet or more, are of little use in the northwestern states of Latin America. Indeed, The Times story gives good reason to doubt their efficiency for military service in any conditions. J. W. N.

NEW POSTMASTER-GENERAL TAKES OFFICE

Here is shown Hon. Samuel Gabriel, new Postmaster-General of Canada, right, with Hon. Arthur Sauve, left, who has just vacated the post, and John A. Sullivan, centre, the new Deputy Postmaster-General.

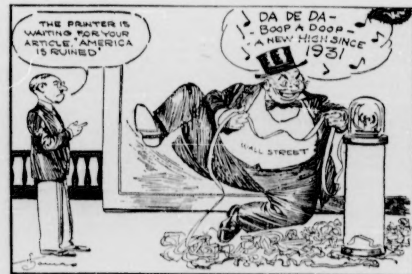

FAMOUS AUTHOR GREETED CANADIAN STUDENTS

This picture was taken when eighty-four Canadian boys and girls visited Rudyard Kipling, the famous author, at St. Winifred's School, Eastbourne. The Canadian scholars are on a visit to the mother country under the auspices of the Overseas Education League. Rudyard Kipling and Mrs. Kipling are seated in the centre of a group of the students.

ORGANIZERS TARRED AND FEATHERED

Amid wild scenes, which included gunfire and tear gas, a band of nearly 300 self-styled vigilantes tarred and feathered two men and beat three others at Santa Rosa, California, Tuesday. The victims of the attack, Solomon Nitsberg, left, and Jack Green, right, were victims of the vigilantes' activities, were attempting to organize California fruit pickers. The sheriff said no action would be taken unless complaints were made, and added that he didn't anticipate any.

GO AWAY—HE'S BUSY

BOASTS OF SLAYING 25 MEN IN MOUNTAINS

Possees have been organized to make an intensive search of the wild Sierra mountains country near Ashland, California, following the boast of Earl (Bud) Kimball, 21, that he had killed 25 men. Kimball, a prospector, was taken into custody following the finding of the body of James O. Kennell, former Chicago business man, in an abandoned mine shaft. Kimball, shown in his cell at Ashland, was reported to be the known slayer of at least two men. The mysterious disappearance of several men recently in the remote hill country matches Kimball's story. At the right is a group of possees, organized as one of the searching parties.

FACTS AND FIGURES OF THE AUTOMOBILE INDUSTRY

The following statistics are from Facts and Figures of the Automobile Industry, 1935 edition, published by the Canadian Automobile Chamber of Commerce, Toronto. The figures are for calendar year 1934.

An increase of almost 80 per cent in the amount of wages paid to workers in the automobile manufacturing plants is an indication of the recovery shown by the industry during 1934. Production was valued at \$70,135,448, which was 78% over the 1933 figure and the highest value reported since 1927.

Motor vehicle production alone amounted to 110,857 cars and trucks with a factory sales value of \$70,000,424. This was an increase of 77% in number and 81% in value over the 1933 production.

Production for the first six months of 1935 was 111,203, an increase of 35.3% over the 82,084 units produced in the same period 1934.

The gain in the industry were reflected in added employment in the several hundred plants located throughout the Dominion engaged in the manufacture of materials and parts. Complete statistics for these varied industries are not available but returns to the Canadian Automobile Chamber in Commerce from 107

CROWNED "MISS NORTH AMERICA"

Crowned "Miss North America" at a beauty contest at Old Orchard Beach, Maine, Miss Jenni Starr, left, of Montreal, received her trophy from Marion Mull, right, Philadelphia artiste model.

NOMINATED

Rennie H. Hague, Conservative organizer for the district of Comox-Alberni, British Columbia, who has been chosen to contest the riding in the forthcoming general election.

that exhibits of sewing should be carefully washed and pressed as best workmanship and appearance were considered in judging. While ready-made garments somewhat discouraged sewing, she would have liked to see more exhibits in this class and exhorted the girls to take a greater interest in home sewing.

Mr. George Wilson of the Department of Education informed the school pupils that the display of carrots, beets and cabbage was the best he had seen. The potatoes, he said, lacked quality for any high award which he thought was due to an adverse season and some which had been touched by frost. He stressed that quality was not always in the largest vegetables and that exhibitors should choose their display by other points from which choice is made.

In the exhibit of shelled dried peas some had not been dried sufficiently and appeared as if they had been picked the day before. The manual training display showed him highly, and he hoped to see more entries in this field in future school fairs. The wheat exhibit, he said, were particularly good as were others in the grain section. His only criticism was that they were too light and he advised his hearers to prepare their shovels with a larger number of heads, as there should be at least three to five inches in diameter just below the head in each sheaf.

He announced that prize winners from this School Fair would be able to take advantage of the scholarships given by the Department of Agriculture at the Vermilion School next summer.

(The complete list of prize winners is on Page Two)

Chant, Minister of Agriculture, Trade and Industry; Hon. William Abernethy, Premier and Minister of Education; Hon. C. C. Ross, Minister of Lands and Mines.

North Peace River Trapper Supports Tribune's Claim

Charles Murchison of the Whitewater district trapper, erstwhile hunter and radio singer, who is at present staying in Grande Prairie, in conversation with The Tribune reporter had the following to say with regard to the Tribune's contention that trap lines should be registered. He further stated that he was absolutely in favor of the suggestions contained in the petition, being circulated among the regular trappers, urging upon the government of Alberta to adopt the same registered trap line system in operation in British Columbia.

"Under the present law," said the trapper, "there are too many trappers on one line, with the result that it is only a matter of time when there will be no fur-bearing animals left. I hope that the government will act upon the suggestions as contained in the petition, that each trapper be given a trap line of his own, for which he is responsible."

Mr. Murchison, who originally came from the Highlands of Scotland, is a man of varied abilities. For some time he was a singer over Station CICA, Edmonton, several years ago.

LOCAL AND GENERAL

Dr. L. J. O'Brien is leaving on tomorrow night's train to attend the Medical Association's three-day convention held at the University of Toronto, next Tuesday. Dr. O'Brien will address the meeting on "Experiences in Rural Practice."

Miss Marquette Michaels is spending three weeks at the coast on her holidays. Mr. and Mrs. Fred Harley returned to Peace River town last Sunday. They were joined at Fairview by Miss Vera Guthrie and Mrs. Fred Makinson.

Art Ranaugh, a member of the Royal Air Force at Edmonton, returned home on Tuesday following a visit of two weeks among friends in Grande Prairie.

The Young People's Social Club are holding a party and dance in the LOOGE Hall this Friday, commencing at 8 p.m. Music will be provided by members of the band.

De and Mrs. W. T. Haynes returned last Friday from two weeks holiday spent in Edmonton.

Major R. W. Hale, superintendent of post offices for Edmonton and north, and G. M. Beaton, post office inspector, both of Edmonton, were guests at the Murray Hotel on Wednesday. They returned to their west on Thursday on an inspection tour of post offices in that district.

Miss S. Anderson is returning to Hayhoe on Friday's westbound train, following a few days visit in Grande Prairie.

Dr. D. R. McNab of Calgary, president of Alberta Medical Association, arrived by motor on Wednesday night and is a guest at the Grande Prairie Hotel. Dr. McNab is on his annual tour and will address a meeting of doctors on Friday afternoon prior to his return on tomorrow night's train.

Mrs. T. E. Cooper and Miss Lois Cooke left on Tuesday's train for Edmonton, where Lois will take a business course at the Commercial High School during the term commencing September 10. Mrs. Cooke will spend a few days with her sister, Mrs. M. McCord.

All interested are asked to keep in mind the 5th Credit Federal Convention to be held in Fairview on Tuesday, September 17, for the purpose of nominating a candidate to contest the riding. Convention called for 12 noon. In-12

Ethiopian Ruler Thankful Britain's Stand at Geneva

ADDIS ABABA, Sept. 12.—Emperor Haile Selassie today expressed his profound gratitude for the British stand at Geneva, backing the League of Nations' covenant and opposing aggression. "The title seems to have turned," said the Emperor and smiled. "We face the future with renewed confidence."

ROME, Sept. 12.—Italy tightened the ties between her land and sea forces in and near East Africa today as hints were heard in diplomatic circles that October 10 might be the "zero hour" for hostilities with Ethiopia. Diplomats said their information came from government sources, but the date could not be confirmed officially.

Meanwhile, Italian officials, in indifference toward the League of Nations' dealings, becoming edged with irritation in London's new start of 5,000 troops for East Africa. Plans were announced for close collaboration between the fleet and navy.

GENEVA, Sept. 12.—France, it was authoritatively learned, is ready to support any financial or economic sanctions that may be imposed against the aggressor, Italy, in the Italian-Ethiopian dispute. On the other hand, Havas News Agency learned from a highly placed source in France, it is opposed to military or naval sanctions. Havas was able to assert on similarly reliable authority that closing of the Suez Canal is considered as being entirely out of the question.

GENEVA, Sept. 11.—British stands unreservedly in the covenant of the League of Nations. The League Assembly was told today by Sir Samuel Hoare, Foreign Secretary. The present dispute between Italy and Ethiopia was no exception.

Britain's hold pledge to back the covenant of the League of Nations in its entirety, was interpreted as an indication Britain will not shrink from collective sanctions if these become necessary to quench the threatened hostilities between Italy and Ethiopia.

The Italian delegates immediately interpreted the speech as a British "threat to quit the League unless the League takes England." The delegates of small nations, however, gave

an interesting feature of the past few years is the growth of fruit exports from Empire countries, says the Imperial Economic Committee, when the world total seems more or less stationary or even declining. In 1933 exports of apples from Canada, Australia, and New Zealand; of citrus fruits from South Africa and Palestine; of grapes from South Africa; of raisins and currants from Australia and South Africa were in each case substantially above the average of 1927-31.

EDMONTON, Sept. 12.—No shortage of labor for harvesting of Alberta's crop will be experienced if married men who are recipients added to the army of workers, stated W. Snitten, Alberta Labor Commissioner, Tuesday, commenting on a Calgary dispatch which feared a shortage of manpower.

EDMONTON, Sept. 12.—Hog market steady with weaker undertone. Carcasses sold at \$8.50, trucked at \$8.75.

Typists classified as are proving very effective.

STUDENTS RECEIVE HIGH MARKS IN JUNE EXAMS OF G. P. BUSINESS COLLEGE

Results in the Grande Prairie Business College examinations held previous to the end of the school term have just been received from the examining board of the Faculty of Teachers in Commerce direct from London, England, by Rev. R. J. Pierce, who was supervisor during the June examinations. Of the nine entries, six were successful, and three gained distinction.

Mrs. Stokes, principal of the college, took her training in England and is Associate of the Faculty of Teachers in Commerce. She informed a Tribune reporter that "as distinction in the advanced examinations is the highest standard for students of business courses in London, I think that Grande Prairie students made a very good showing."

The successful pupils were: Advanced Shortland, Dennis Law (distinction); Speed Shortland, 110 words per minute; Dennis Law (distinction); Speed Shortland, 80 words per minute; Muriel Weicker (distinction). The following passed in the advanced typing examinations: Dennis Law, Muriel Weicker, Daphne Counsel.

Evening classes advanced last Monday at the college, and more students are expected to enroll next week.

GOOD NEWS! FOR MEN

Men will appreciate the value we offer in our selected stock of new custom suitings for Fall wear.

We have just received for your approval the choice of Scotch and English mills in the season's newest patterns and weaves.

Treat yourself to one of these new suitings. Our reputation for custom tailoring is backed by many particular customers. You, too, will appreciate the quality and workmanship that has made Harvey clothes popular with particular customers.
